

Digital Images

This new technology brings the exciting possibility to add any graphics to most types of signs, (illuminated or non illuminated) greatly expanding their visual range potential. The huge variety of colour and media we can work with, and the added flexibility in designing now allows us to create just about anything you can dream of.

Digital printing offers your business, a unique opportunity to display your products, your image or in fact, any full-colour photograph in a dynamic formats such as....

- Huge flex face signs
- Digital building wraps
- Illuminated sign faces, the photographic images
- Motor vehicle graphics and wraps
- Display, an exhibition point of sale and other unique signage

Images can be provided from your photographic file or have our creative art department create that special image for you.
