

Pylon

Signs by Knight manufacture & installation. No project to large nor small. From traditional freestanding pylon to customized shapes to compliment any building design or architecture.

Signs by Knight design and manufacture all types of pylon signs. They can arrange all necessary engineering, structural and council requirements. Pylon signs consist of single or twin steel poles, and are occasionally clad with various substrates for aesthetic appeal. Generally these signs are lit and can have neon highlights for extra pizzazz! Pylon signs stand proud and tall, and are used to grab attention at road level, when the business may be recessed back off the road.
